

CompLife 2006 Crossing Borders

2nd International Symposium
on Computational Life Science

University of Cambridge, 27 - 29.09.06

❖ May 15: Papers due ❖ June 26: Notification of acceptance ❖ July 10: Final papers due

Computational Life Science

This is the second international symposium to cross borders and focus on computational methods for the modeling, analysis and exploration of all aspects of life sciences, ranging from effects on the molecular level to complex interaction networks.

Of prime importance for this truly interdisciplinary event will be the integration of the three areas, Computer Science, Biology, and Chemistry. The program will consist of contributed presentations regarding applicational aspects as well as new theoretical developments.

General Chair

Michael Berthold,
University of Konstanz, Germany

Program Chair

Robert Glen
Unilever Centre, University of Cambridge, UK

Publicity Chair

Andreas Bender, Novartis Institutes
for BioMedical Research, Boston, USA
Thorsten Meinl, University of Erlangen-Nuremberg,
Germany

Conference Chair

Heather Fyson, University of Konstanz, Germany

Local Chair

Susan Begg, Unilever Centre, University of
Cambridge, UK
